EDUCATION

Bachelor of Engineering (B.E) - Artificial Intelligence and Data Science 2022-2026
Sandip Institute of Technology and Research Centre (SITRC) | CGPA: 8.93

WORK EXPERIENCE

Resolute Ai | Software Development Intern Bengaluru, India (Remote) | 03/2025 - 06/2025

- Architected and implemented a scalable MySQL database for a task management platform, optimizing schema design to **improve query performance by ~35%.**
- Integrated seamlessly with a React frontend and supported **100+ active users.** Contributed in an Agile team, enhancing **delivery efficiency by ~20%.**

Chums Ai | Software Development Intern Mumbai, India (Remote) | 01/2025 - 03/2025

- Developed a scalable AI-based customer query categorization platform using Python, Flask, and machine learning.
- Henceforth achieved **85%+ accuracy** and optimized backend APIs with PostgreSQL and RESTful integration.

PROJECTS

AidConnect - Hackathon Finalist | GitHub

Tech Used: React, JavaScript, MySQL, Python, LLMs

- Crafted a donation platform facilitating direct goods delivery from shopkeepers to NGOs, eliminating monetary fraud and enabling smooth transactions. Devised an **AI-based shop matching algorithm** using **llama 3.2** to recommend optimal vendors based on location, item availability, and NGO reviews.

MediBuddy – Multimodal Voice & Vision Healthcare Assistant | GitHub

Tech Used: Python, Gradio, Llama 3, Eleven Labs, OpenAI Whisper

- Designed a multimodal healthcare assistant enabling voice and image-based diagnosis simulations. Integrated speech recognition and vision models achieving **~95%** accuracy in test cases.

MentorHub.ai – Domain-Specific AI Mentorship Platform | GitHub

Tech Used: React.js, Node.js, Python, LangChain, OpenAI API, MongoDB, Firebase Auth, Stripe API (for subscriptions)

- Developed a **full-stack AI mentorship platform** where users interact with specialized AI mentors (e.g., AI Lawyer, AI Engineer) trained with domain-specific knowledge using **LangChain and vector databases.**

InSight – Ai Journalist | GitHub

Tech Used:Streamlit, FastAPI, Bright Data MCP, Ollama, ElevenLabs, Web Scraping

- Built an end-to-end AI-powered content generation system that scrapes data from News and Reddit using **Bright Data's Model Context Protocol (MCP)** and **anti-bot scraping** techniques.

TECHNICAL SKILLS

Languages/ Database: Java, ReactJS, HTML5, CSS3, Javascript, Python, MySQL, MongoDB, Postgres

IT Constructs: DBMS, Data Structure and Algorithm, OOPS Programming.

Tools and Technologies: Working knowledge of IDEs, build tools, Git version control, Postman.

ACHIEVEMENTS

- **Finalist in TechHorizon Hackathon 2025** – Selected among 300+ participants for developing an innovative tech solution addressing.
- **Winner – Project-Based Learning (PBL) Competition (Academics 2022)** – Led a team to design and present a high-impact academic project on Smart Home Automation System.
